Google Scholar Settings

- Google vs. Google Scholar vs. Library Databases

scholar.google.com

The diagram illustrates the process of navigating to Google Scholar settings. It consists of three panels:

- Panel 1:** Shows the main Google Scholar homepage with a sidebar containing links: Articles, Case law, Profiles, My profile, My library, Alerts, Metrics, Advanced search, and Settings. A blue arrow labeled "1" points to the "Settings" link.
- Panel 2:** Shows the "Settings" page. A blue arrow labeled "2" points to the "Library links" section. This section includes a text input field containing "Old Dominion" and a search icon, along with a placeholder "e.g., Harvard".
- Panel 3:** Shows the "Library links" configuration. It lists three checked options: "OLD DOMINION UNIVERSITY - ProQuest Fulltext", "Old Dominion University - Check for full text @ ODU", and "Open WorldCat - Library Search". The third option is circled in red.

CS Library Resources

□ Library databases for high-quality, scholarly information:

Computers & Applied Sciences Complete

- 500+ full-text peer-reviewed journals, 600+ full-text journals/magazines
- Covers computing, technology, and computer engineering

ACM Digital Library

- Full-text ACM publications
- Selected full-text from other publishers

IEEE Xplore

- Full-text computer engineering content
- Over 1800 conferences, 200+ journals, 9K standards

Science Direct

- Premier research database for all sciences
- Scholarly articles, book chapters
